

LLM code environment (code)

Step 1 message source: E1-E7 and horizon, frozen message bank (qwen3:8b-written templates, sha256-pinned); E8, LLM attacker (gpt-oss:20b); E9, structured intents (no text).
Step 2 is code in E6, E7 (rule extractor) and E9 (parser).
Step 4 is a scripted buyer (code) in E1, E6, E7 and E9.
The buyer sees claim cards, never raw supplier text.
